B.S. Game and Simulation Arts & Sciences,  
Concentration in Human-Computer Interaction

## Skills

Javascript

SCSS/CSS

HTML

Vue/React

Wireframing

UI/X Design

## Experience

**Senior Frontend Engineer, Happie (2018 - Present)**

Participate in process and architectural decision making, act as team leader in module-based development sprints. Provide UI/X feedback and guidance to designers.

**Frontend Developer, Happie (2017-2018)**

Operated as part of a tightly knit development team using a modern frontend stack to deliver a responsive, easy to use, and easy on the eyes application. Made heavy use of ajax and ES6 functionality.

**User Experience Consultant, Tallan (2016-2017)**

Had a hand in everything front-end from UX wireframing to final implementation. Picked up new technologies quickly based on client needs in an Agile work environment. Worked on a number of projects including public websites, mobile apps, and enterprise tools.

**Director of Adventure Ed., Camp Equinunk (2015)**

Managed a team of twelve adventure education specialists, providing guidance and troubleshooting issues as they occurred. Created weekly and daily schedules, work orders, and performed rigorous equipment safety checks with no room for error.

**User Experience Analyst, Sodexo USA (2014)**

Identified and resolved productivity-hindering issues in order tracking software. Performed surveys and usability tests to ensure the chosen solution was ideal for deployment.
